

WITHOUT TRANSOM

## FREESTANDING - NO ROOF

### Description

This freestanding tenant storage locker features 7'-8' high posts. All side panels are made of 2"x2"x6&8GA galvanized welded wire mesh and do not require angle frame. This innovative unframed design allows for any necessary trimming around water pipes, wall irregularities and obstructions to be done right on-site, eliminating costly installation charges. Swing doors are made of framed 2"x2"x10GA welded wire mesh with a powder coated tough paint finish. Heavy-duty 1 1/8"x1 1/8"x12GA structural steel transom angle runs across the top of each unit, creating a superior reinforced frame. Posts are equipped with adjustable foot plates for added stability on uneven surfaces.

\* Padlock hasps and door stoppers come standard with all single tier tenant storage lockers.
